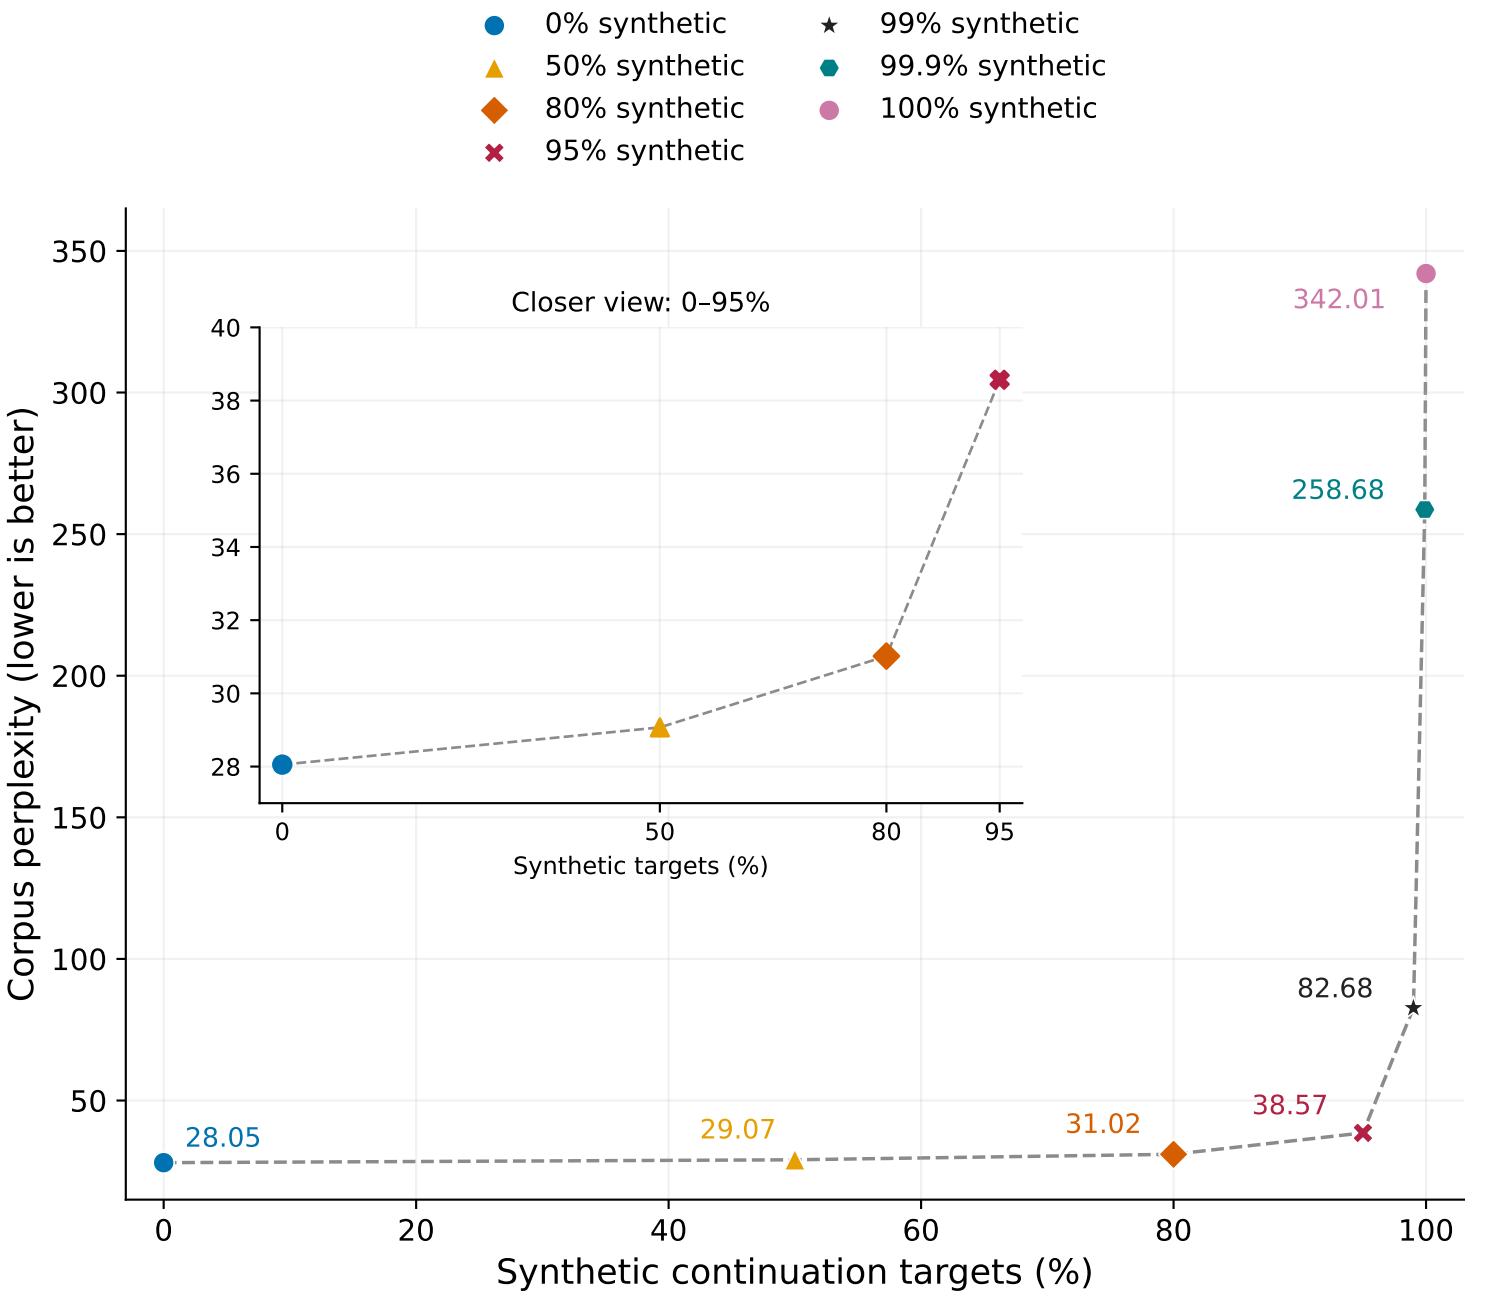
Final real-test perplexity versus synthetic share



All values are from cycle 10; both axes use actual numerical values.
Dashed joins are visual guides, not fits or evidence about untested fractions.
Seed 42 · shared cosine LR 5e-6 → 1e-6 · 6.4 million targets per arm
95/99/99.9%: RTX PRO 4500; other shown conditions: RTX PRO 4000
